(DANB). DANB®, Dental Assisting National Board®, RHS®, ICE®, and Measuring Dental Assisting Excellence® are registered service marks of DANB. CERTIFIED DENTAL ASSISTANT™ is a certification mark of DANB.

MONTANA: OVERVIEW

State-approved 4/22/2020

State Job Titles

State Career Ladder

There is one recognized level of dental assistant in Montana. See the following pages for details about requirements and allowed functions for this level. Numbers for each level are provided for internal reference and do not correspond to specific state designations.

2 DANB Certified Dental Assistant (CDA)

1 Dental Auxiliary

State Radiography Requirements

State Radiography Requirements

To legally operate dental x-ray equipment and perform dental radiographic procedures under the **direct supervision** of a dentist in Montana, a dental assistant must:

I. Successfully complete the national DANB Radiation Health and Safety (RHS) exam. After successfully completing the DANB RHS exam, DANB will issue the dental assistant a DANB RHS certificate of knowledge-based competency. Dental assistants are not legally allowed to expose radiographs in Montana until they receive the RHS certificate from DANB

OR

II. Graduate from a CODA-accredited dental assisting program

OR

III. Be certified in dental radiography as a result of military experience

To expose radiographs under the **general supervision** of a licensed dentist, a dental auxiliary must hold DANB's CDA certification.

Note: Effective Jan. 1, 2016, radiology certification from other states will no longer be accepted, with the exception of a board-approved written examination. Dental auxiliaries who acquired radiology certification in other states and were employed as dental auxiliaries in Montana prior to Jan. 1, 2016, will be grandfathered.

Prohibited Duties

Functions NOT Permitted by Dental Assistants in Montana

Functions with numbers correspond to functions included in a 2002-2005 study of dental assisting core competencies. See Appendix A for more information.

The following functions are **not** permitted by **any** level of dental assistant under any level of supervision*:

- 12, 33, 51. Placing, carving or condensing any permanent restorations
- 46. Taking final impressions of the involved arch for crowns, bridges, implant prosthesis, partial or complete dentures
- Diagnosis and treatment planning
- Cutting hard or soft tissue or extracting teeth
- Prescribing any drugs
- Administering or dispensing any drug, without the prior authorization of the supervising dentist
- Bonding or cementing any fixed prosthesis, including veneers, except for provisionals
- Bonding or cementing orthodontic brackets or orthodontic appliances that would provide activation upon cementation
- Placing sulcular medicinal or therapeutic materials
- Periodontal probing
- Air polishing
- Prophylaxis

The following functions may **not** be performed by a dental auxiliary holding DANB CDA certification and working under the **general supervision*** of a dentist:

- 12, 51. Amalgam restorations
- 27. Placing and removing rubber dams
- 45. Placing and removing matrices
- 56. Applying topical anesthetic agents
- 59. Initiating, adjusting, and monitoring nitrous oxide flow for a patient who has been prescribed and administered nitrous oxide by a licensed dentist
- Applying silver diamine fluoride agents

***Direct Supervision:** The provision of allowable functions by dental auxiliaries with the intent and knowledge of the dentist and while the supervising dentist is on the premises.

General supervision: The provision of allowable functions by dental auxiliaries provided to a current patient of record, with the intent and knowledge of the dentist licensed and residing in Montana. The supervising dentist need not be on the premises.

1 Dental Auxiliary

Requirements

Education, Training and Credential Requirements

A dental auxiliary in Montana may perform basic supportive dental procedures specified by the state dental practice act (see below) under the direct supervision of a licensed dentist.

To qualify, one must:

- I. Graduate from a CODA-accredited dental assisting program
OR
- II. Receive instruction and training by a licensed dentist
OR
- III. Receive instruction and training in a board-approved continuing education course

Allowable

Allowable Functions

Functions with numbers correspond to functions included in a 2002-2005 study of dental assisting core competencies. See Appendix A for more information.

Under Direct Supervision*

2 DANB Certified Dental Assistant (CDA)

Requirements

Education, Training and Credential Requirements

To perform duties under the **general supervision** of a licensed dentist, a dental auxiliary must:

- Hold DANB Certified Dental Assistant (CDA) certification

Allowable

Allowable Functions

Under General Supervision*

- Perform any duty that may be delegated to a dental auxiliary, excluding those duties prohibited under general supervision (see "Prohibited Duties" on previous page)
- 40. Place pit and fissure sealants (*following an in-person comprehensive oral examination or periodic examination within the preceding 30 days*)

***Direct Supervision:** The provision of allowable functions by dental auxiliaries with the intent and knowledge of the dentist and while the supervising dentist is on the premises.
General supervision: The provision of allowable functions by dental auxiliaries provided to a current patient of record, with the intent and knowledge of the dentist licensed and residing in Montana. The supervising dentist need not be on the premises.

Appendix A: Numbering System for Dental Assisting Functions

The following list of 70 dental assisting tasks was developed by the ADA/DANB Alliance as part of a study of dental assisting core competencies conducted between 2002 and 2005. These selected tasks were determined to be representative of a broad range of dental assisting core competencies.

The numbered functions listed in the preceding state charts correspond to functions that were included in the DANB/ADAA core competencies study and use language directly from the state's dental practice act. The numbers are provided to facilitate comparison between and among states. Functions listed with bullets in the preceding charts are part of the state's practice act but are not specific matches to the functions that were included in the 2002-2005 study.

1. Perform mouth mirror inspection of the oral cavity
2. Chart existing restorations or conditions
3. Phone in prescriptions at the direction of the dentist
4. Receive and prepare patients for treatment, including seating, positioning chair and placing napkin
5. Complete laboratory authorization forms
6. Place and remove retraction cord
7. Perform routine maintenance of dental equipment
8. Monitor and respond to post- surgical bleeding
9. Perform coronal polishing procedures
10. Apply effective communication techniques with a variety of patients
11. Transfer dental instruments
12. Place amalgam for condensation by the dentist
13. Remove sutures
14. Dry canals
15. Tie in arch wires
16. Demonstrate knowledge of ethics/ jurisprudence/patient confidentiality
17. Identify features of rotary instruments
18. Apply topical fluoride
19. Select and manipulate gypsums and waxes
20. Perform supragingival scaling
21. Mix dental materials
22. Expose radiographs
23. Evaluate radiographs for diagnostic quality
24. Provide patient preventive education and oral hygiene instruction
25. Perform sterilization and disinfection procedures
26. Provide pre- and post-operative instructions
27. Place and remove dental dam
28. Pour, trim and evaluate the quality of diagnostic casts
29. Size and place orthodontic bands and brackets
30. Using the concepts of four- handed dentistry, assist with basic restorative procedures, including prosthodontics and restorative dentistry
31. Identify intraoral anatomy
32. Demonstrate understanding of the OSHA Hazard Communication Standard
33. Place, cure and finish composite resin restorations
34. Place liners and bases
35. Place periodontal dressings
36. Demonstrate understanding of the OSHA Bloodborne Pathogens Standard
37. Take and record vital signs
38. Monitor vital signs
39. Clean and polish removable appliances and prostheses
40. Apply pit and fissure sealants
41. Prepare procedural trays/ armamentaria setups
42. Place orthodontic separators
43. Size and fit stainless steel crowns
44. Take preliminary impressions
45. Place and remove matrix bands
46. Take final impressions
47. Fabricate and place temporary crowns
48. Maintain field of operation during dental procedures through the use of retraction, suction, irrigation, drying, placing and removing cotton rolls, etc.
49. Perform vitality tests
50. Place temporary fillings
51. Carve amalgams
52. Process dental radiographs
53. Mount and label dental radiographs
54. Remove temporary crowns and cements
55. Remove temporary fillings
56. Apply topical anesthetic to the injection site
57. Demonstrate understanding of the Centers for Disease Control and Prevention Guidelines
58. Using the concepts of four- handed dentistry, assist with basic intraoral surgical procedures, including extractions, periodontics, endodontics and implants
59. Monitor nitrous oxide/oxygen analgesia
60. Maintain emergency kit
61. Remove permanent cement from supragingival surfaces
62. Remove periodontal dressings
63. Place post-extraction dressings
64. Fabricate custom trays, to include impression and bleaching trays, and athletic mouthguards
65. Recognize basic medical emergencies
66. Recognize basic dental emergencies
67. Respond to basic medical emergencies
68. Respond to basic dental emergencies
69. Remove post-extraction dressings
70. Place stainless steel crown

Appendix B: Levels of Supervision

An important consideration in the discussion of the delegation of tasks to dental assistants is that of supervision of dental assistants by their dentist-employers. The American Dental Association (ADA) has identified five levels of supervision for allied dental personnel, including dental assistants, which it defines in its “Comprehensive Policy Statement on Allied Dental Personnel,” (2010: 505) which is part of its *Current Policies*, last updated in 2019. Note that “allied dental personnel” refers to dental assistants, dental hygienists and dental laboratory technicians.

The five levels of supervision defined by the ADA are as follows:

Personal supervision. A type of supervision in which the dentist is personally operating on a patient and authorizes the allied dental personnel to aid treatment by concurrently performing a supportive procedure.

Direct supervision. A type of supervision in which a dentist is in the dental office or treatment facility, personally diagnoses and treatment plans the condition to be treated, personally authorizes the procedures and remains in the dental office or treatment facility while the procedures are being performed by the allied dental personnel, and evaluates their performance before dismissal of the patient.

Indirect supervision. A type of supervision in which a dentist is in the dental office or treatment facility, has personally diagnosed and treatment planned the condition to be treated, authorizes the procedures and remains in the dental office or treatment facility while the procedures are being performed by the allied dental personnel, and will evaluate the performance of the allied dental personnel.

General supervision. A type of supervision in which a dentist is not required to be in the dental office or treatment facility when procedures are provided, but has personally diagnosed and treatment planned the condition to be treated, has personally authorized the procedures, and will evaluate the performance of the allied dental personnel.

Public Health Supervision. A type of supervision in which a licensed dental hygienist may provide dental hygiene services, as specified by state law or regulations, when such services are provided as part of an organized community program in various public health settings, as designated by state law, and with general oversight of such programs by a licensed dentist designated by the state.

Furthermore, the ADA’s “Comprehensive Policy Statement on Allied Dental Personnel” stipulates that intraoral expanded functions should be performed by allied dental personnel “under the supervision of a dentist.”

Because the study of dental assisting core competencies undertaken by the ADA/DANB Alliance did not address the question of supervision, the ADA/DANB Alliance has not made any recommendations as to the levels of supervision that should be necessary for the delegation of the tasks included in the study to dental assistants. However, the ADA/DANB Alliance believes it is important to call attention to the fact that while the ADA has defined supervision levels in the aforementioned policy statement, which governs the ADA’s own activities and the activities of its members, these definitions have not been uniformly adopted by the dental boards of every U.S. state or district.

For the purposes of the attached charts, if a state’s dental practice act specifically defines levels of supervision, the state-specific definitions are provided as a footnote to the lists of allowable functions for each level of dental assistant.
